### **SUNDAY, 12/4 UPDATE FROM TUD EMERGENCY WATER CONSERVATION NEEDED FOR PONDEROSA HILLS**

SONORA, CA: With the help of PG & E and Tuolumne Utilities District (TUD) crews, water is slowly being restored to the TUD ditch system. This is a slow process and water conservation is still needed until the water storage tanks have an ample supply. TUD would like to thank its customers for their water conservation efforts which have helped sustain water supplies.

**Ponderosa Hills** customers today are being asked to go into emergency water conservation measures. The water storage tank in the Ponderosa Hills area is very low and all customers are being asked to use as little water as possible for at least the next 24 hours.

TUD customers are still being asked to continue their water conservation efforts. The water storage tanks that serve these areas remain low and conservation measures are still needed.

#### **Emergency Water Conservation Measures are Urged**

- No outside watering
- Limited use indoors
- Turn off your automatic lawn and drip sprinkler timer

Thank you for your cooperation and assistance. For updated information, please go online to the TUD website at [www.tudwater.com](http://www.tudwater.com).
