PRESS RELEASE SCHEDULED WATER OUTAGE – BRENTWOOD PARK AREA

Sonora, CA – February 4, 2009
FOR IMMEDIATE RELEASE

Contact: Lisa Westbrook
Customer Service Supervisor, TUD

Tuolumne Utilities District maintenance crews will be continuing work on the Brentwood Bypass Water Pipeline project and to prepare in advance for connection of the new pipeline system, have scheduled a necessary water outage for Monday, February 9, 2009.

Tuolumne Utilities District customers along Little Fuller, South Fork Road to Longeway will experience a water outage from 9am to 3pm on Monday, February 9th. An estimated 200 customers will be affected. Please prepare in advance by filling containers with water, having bottled water on hand or filling a bathtub to provide water for toilet flushing.

This project, constructed by Mazingo Construction, started December 1, 2008 and takes place along Middle Camp Road and South Fork Road from the northern section of Tanager Road to Little Fuller Road. The goal of the Brentwood Bypass Water Pipeline Project is to improve District operations for water customers from the Lakewood and Brentwood Park areas to the Mono Vista area. Completion is estimated for the end of February, weather permitting.

We apologize for the inconvenience and plan to have water restored to this area as quickly as possible. For more information, please contact Lisa Westbrook, Customer Service Supervisor at 209-532-5536, ext. 501.
