## TUD TOILET REBATE PROGRAM

### PURPOSE:

Tuolumne Utilities District (TUD) is supporting an effort to maximize water resources, using cost effective conservation programs for water management and to comply with state and federal mandated requirements. Setting up a Toilet Rebate Program is beneficial not only to TUD, but to its water customers in an effort to conserve water for the entire District and save our customers money.

### DO YOU QUALIFY FOR A TOILET REBATE?:

This program is designed to assist homeowners and businesses with costs related to replacement of their out-of-date and high water-using toilets. If your home **was built before 1992** and you have a toilet that uses 3.0 gallons of water per flush or more, you may be eligible to receive a rebate. To qualify, the new toilet must be installed at an address that receives water service from Tuolumne Utilities District. Before you purchase your new toilet(s), visit the US EPA Water Sense Website at <http://www.epa.gov/watersense/pp/het.htm> for a list of qualifying models.

### ELIGIBILITY:

All water customers of TUD shall be eligible to receive a \$45.00 conservation rebate, up to a maximum of three toilets per residential customer account, and with no maximum for a commercial business, for the replacement of toilets that were designed to use in excess of 3.0 gallons per flush, with approved low-flow models using 1.6 gallons per flush or less. Participants must submit a purchase receipt for each rebate within six months from the date of purchase and authorize District inspection of the completed replacement before payment shall be made.

### REFUND:

Complete the information below, attach purchase receipt for each toilet purchased (must be within six months from the date of purchase), and remit completed form to the TUD office, 18885 Nugget Blvd., Sonora, CA 95370.

**INSPECTION:** Applicant authorizes TUD to conduct an on-site inspection of the installation(s).
