

Regional Water Conservation Program

Tuolumne Utilities District is partnering with the Tuolumne County Resource Conservation District to offer a Regional Water Conservation Program to all Tuolumne County residents.

Low Flow Toilet and Showerhead Rebate Application

If you are a Tuolumne County resident you may be able to be reimbursed if you have recently purchased a low flow toilet or showerhead.

- Each resident may receive \$100 for 1 low-flow WaterSense toilet. One application per household.
- Each resident may receive \$25 for 1 WaterSense showerhead. One application per household.
- ***The toilet or showerhead must be a WaterSense product.***
- The program is applicable to all receipts dated as of January 1, 2017 that have not already participated in a rebate program.
- All applicants must complete the information below and attach all receipts to the application in order to receive a rebate.
- Complete the information below. Once completed and submitted, a check will be mailed from Tuolumne Utilities District to the address listed on the form within 60 days.
- This program is available through grant funding. The program is anticipated to be completed by November 30, 2018.
- **Twain Harte Community Services District customers**, apply directly at <https://www.twainhartecsd.com/>

LOW FLOW/SOWERHEAD INFORMATION

Fixture	Model Number	Reimbursement Available	Watersense label (Yes or No)	Date on Receipt
Toilet		\$100.00		
Showerhead		\$25.00		
Total for Reimbursement				

**How Much Water Does a Low-Flow Toilet Save?
(Answer: On the Other Side)**

LOW FLOW TOILETS

The toilet is the single biggest water user in your home. Flushing accounts for about one-third of the water used within your home each day.

Replacing an old model toilet with a new low-consumption toilet could automatically and permanently cut your home water consumption by 25% or more. Saving water will help you save money!

LOOK FOR THE WATERSENSE® LABEL

Unlike some first-generation, "low-flow" toilets, **WaterSense**® labeled toilets combine high efficiency with high performance. Design advances enable WaterSense labeled toilets to save water with no trade-off in flushing power. Whether remodeling a bathroom, or simply replacing an old, leaky toilet that is wasting money and water, installing a WaterSense® labeled toilet is a high-performance, water-efficient option worth considering. If every American home with older, inefficient toilets replaced them with new WaterSense labeled toilets, we would save nearly 640 billion gallons of water per year, equal to more than two weeks of flow over Niagara Falls!

For more information or a list of WaterSense labeled products, visit www.epa.gov/watersense.
